

ELECTRIC MOTOR BOAT CONVERSION

OUR SYSTEMS ARE designed for larger, heavier displacement boats including non planing motorboats, heavy duty commercial boats & small passenger ferries.

Electric motor boats are cleaner, safer, more powerful and efficient than fossil fuel (gas or diesel) boats.

- 48V DC Heavy Duty Marine motors
- Modular 10 - 50 HP motors with integrated controller
- 20'-50' long Boat Conversion
- On or off Pier Photovoltaic renewable energy systems
- PowerLord High Energy BATTERY STORAGE power

Drive motor systems can be stacked in series to achieve higher power.
